*Epidemiol. Infect.* (1998), **120**, 339–340. Printed in the United Kingdom © 1998 Cambridge University Press

# Index of Subjects

**Acinetobacter** bacteraemia in patients with diarrhoeal disease, 139

***Bordetella bronchiseptica***, the use of pulsed-field gel electrophoresis to examine the epidemiology of, isolated from cats and other species, 201

***Campylobacter jejuni***, validity of *Sma*I-defined genotypes of, examined by *Sal*I, *Kpn*I, and *Bam*HI polymorphisms: evidence of identical clones infecting humans, poultry, and cattle, 231

**Cercarial dermatitis**, public health importance and risk factors for, associated with swimming in Lake Leman at Geneva, Switzerland, 305

**Cheese**, a community outbreak of *Salmonella berta* associated with a soft, product, 29

**Chlamydial**, prevalence of HIV, syphilis and genital, infection among women in North-West Ethiopia, 171

***Chlamydia pneumoniae*** is a risk factor for coronary heart disease in symptom-free elderly men, but *Helicobacter pylori* and cytomegalovirus are not, 93

**Cholera**, funerals during the 1994, epidemic in Guinea-Bissau, West Africa: The need for disinfection of bodies of persons dying of cholera, 7

***Clostridium botulinum***, prevalence of, type E in Finnish fish and fishery products, 245

***Clostridium perfringens***, the, enterotoxin from equine isolates; its characterization, sequence and role in foal diarrhoea, 193

***Coxiella burnetii***, molecular characterization of, isolates, 157

***Cryptosporidium***, surveillance data for waterborne illness detection: an assessment following a massive waterborne outbreak of, infection, 43

**Cytomegalovirus**, *Chlamydia pneumoniae* is a risk factor for coronary heart disease in symptom-free elderly men, but *Helicobacter pylori* and, are not, 93

***Echinococcus multilocularis***, spatial distribution patterns of, (Leuckart 1863) (Cestoda: Cyclophyllidea: Taeniidae) among red foxes in an endemic focus in Brandenburg, Germany, 101

**Erythromycin**, review of the evidence for the use of, in the management of persons exposed to pertussis, 143

***Escherichia coli O157***, occurrence of shigatoxinogenic, in Norwegian cattle herds, 21

***Escherichia coli O157:H7*** diarrhoea associated with well water and infected cattle on an Ontario farm, 17

***Escherichia coli O157***, serum antibodies to secreted proteins in patients infected with, and other VTEC, 239

***Escherichia coli O157***, studies of the presence of verocytotoxic, in bovine faeces submitted for diagnostic purposes in England and Wales and on beef carcases in abattoirs in the United Kingdom, 187

**Equine influenza virus**, identification of two antigenically and genetically distinct lineages of H3N8, in Sweden, 61

***Haemophilus influenzae***, mathematical models of, type b, 281

***Helicobacter pylori***, active infection with, in an asymptomatic population of middle aged to elderly people, 297

***Helicobacter pylori*, *Chlamydia pneumoniae*** is a risk factor for coronary heart disease in symptom-free elderly men, but, and cytomegalovirus are not, 93

***Helicobacter pylori***, prevalence of, infection in a cohort of Italian military students, 151

**Hepatitis A**, foodborne outbreaks of, in a low endemic country: an emerging problem? 55

**Herpes simplex**, an epidemiological study of, virus type 1 and 2 infection in Japan based on type-specific serological assays, 179

**HIV**, estimation of the effect of neutropenia on rates of clinical bacteraemia in, -infected patients, 71

**HIV**, prevalence of, syphilis and genital chlamydial infection among women in North-West Ethiopia, 171

**Meningococcal**, a cluster of, disease in western Sydney, Australia initially associated with a nightclub, 263

**Meningococcal**, amplification of the, *porB* gene for non-culture serotype characterization, 257

**Parasitic infections** among Southeast Asian labourers in Taiwan: a long-term study, 81

**Pertussis**, review of the evidence for the use of erythromycin in the management of persons exposed to, 143

**Pneumococcal**, invasive, infection in South and West England, 117

**Rabies** in Thailand, 165

**Rotavirus infection** in Hong Kong: epidemiology and estimates of disease burden, 321

**Rotavirus**, seroepidemiology of group A, in suburban São Paulo, Brazil, 327

**Rubella**, salivary diagnosis of: a study of notified cases in the United Kingdom, 1991–4, 315

***Salmonella berta***, a community outbreak of, associated with a soft cheese product, 29

***Salmonella enterica***, a community-based outbreak of, serotype Typhimurium associated with salami consumption in Northern Italy, 209

***Salmonella enterica***, epidemiological analysis of, Enteritidis isolates in Japan by phage-typing and pulsed gel electrophoresis, 223

***Salmonella enterica***, IS*200* fingerprint of, serotype Typhimurium human strains isolated in Sardinia, 215

***Salmonella senftenberg***, national outbreak of, associated with infant food, 125
***Staphylococcus aureus***, analysis of methicillin-resistant, by IS*1181* profiling, 271
***Stenotrophomonas maltophilia***, nosocomial outbreak of colonization and infection with, in preterm infants associated with contaminated tap water, 251
**Syphilis**, prevalence of HIV, and genital chlamydial infection among women in North-West Ethiopia, 171

***Toxoplasma gondii***, prevalence of, specific immunoglobulin G antibodies among pregnant women in Norway, 87

**Typhoid**, risk factors for, fever in an endemic setting, Karachi, Pakistan, 129

*Vibrio cholerae*, association of a disease approximating cholera caused by, of serogroups other than O1 and O139, 1

**Waterborne**, surveillance data for, illness detection: an assessment following a massive waterborne outbreak of *Cryptosporidium* infection, 43
**Waterborne**, surveillance of outbreaks of, infectious disease: categorizing levels of evidence, 37
